## Why Wait if We Can Fit Excellent into Our Budget!?

**We were just starting out and on a budget. +**

Our first real house caused us to stretch a bit at first, but then we started to find a little breathing room in our budget. Our kitchen really needed work, but we didn't think we could afford it. We started looking at two of our local home centers, but weren't excited about having to put it all together ourselves. The home center sales people drew pictures that just looked like boxes in a room. They didn't seem to understand what we needed - they missed the wow.

Then close friends suggested we talk with Jerry at Hankins & Associates. We had some ideas, but there were things we weren't sure about - especially on our budget. We learned so much from working with Jerry. We were surprised that we could get solid woods, wonderful finishes and plywood boxes within our budget. Our beautiful kitchen features:

- ◆ Solid cherry cabinetry with dovetailed drawers.
- ◆ Beautiful granite on all our counters.
- ◆ Roll-out shelves, hidden trash, and appliance panels.
- ◆ Plenty of storage - that's clever and purposeful.
- ◆ Design ideas that no one else thought of!

We can't believe we have such a great kitchen that we really love - and that we got it within our budget. We tell all of our friends that they really don't know what they can do with their kitchen unless they ask. And we happily recommend that they invite Jerry over for a friendly conversation.
