Glad Our Competitors Don't Know about Hankins & Associates

"The cabinetry is always a precise fit."

When we first started our construction business, we used to buy cabinetry from our local lumberyard or from a distributor we talked to on the phone. Then we heard about Hankins & Associates.

We checked out Hankins & Associates online and were delighted to learn that they do a lot of design and cabinetry work with businesses such as ours. Here's what we learned:

- They handle all of the details for us- THAT saves us time and money.
- They meet with our clients and work with them to design the kitchen and baths that the homeowners desire, while staying within a predetermined budget.
- But now, for about the same price, we get so much more with Hankins & Associates.
- Although we only purchase the cabinetry from Hankins & Associates, we get so much more. For example, they do all the site measurements; provide detailed plans and elevations, help and guide us through all the details, and also provide us with the kitchen lighting plan- which is a huge plus.
- When it comes to the installation, they meet with our installers to review the plans and place the cabinetry.

Ever since we started using Hankins & Associates, our kitchen and baths have been hassle free, allowing us to focus on all the other details of building a whole home and keep our client happy. Our clients are always happy, which wasn't always the case before. Hankins & Associates offers a great selection and really help my clients understand their options. My guys like installing a Hankins kitchen because everything fits. And if we ever have questions, Jerry is accessible. Working with Hankins & Associates makes me look good. But please, don't tell my competitors!
