INSTALLATION	13%	13%
ELECTRICAL & PLUMBING	11%	9%
MISC. & OTHER	4%	2%
BUDGET RANGE		
ADJUSTED		

Determining a budget for your new kitchen may seem like be a confusing task. What should you expect to invest? Please use the chart above to help determine a basic budget range and suggested allocation of funds to the specific phases of a kitchen remodel.

A good ‘rule of thumb’ is budgeting between 10% to 20% of your homes market value towards your kitchen-remodeling project. Please remember that this is only a guide and all figures are subject to the size of the kitchen, quality level and custom ability that you desire.

This chart is provided for example purposes only. Your actual budget will vary based on selection and project scope.
